TECHNICAL SKILLS

- SQL
- Python
- R
- Excel / Sheets
- Tableau
- Power BI
- PostgreSQL
- AI Prompt Engineering
- Data Pipeline Design
- Process Mapping
- Root Cause Analysis
- Cross-Functional Reporting
- Stakeholder Presentations
- Workflow Automation
- Data Validation

EDUCATION

Master of Business Administration (MBA)

Guilford College, Greensboro, NC

Aug 2024 – Aug 2025 · GPA: 3.73/4.0 · Dean's List (All Semesters)

Bachelor of Science, Analytics (Business Minor)

Guilford College, Greensboro, NC

Aug 2021 – May 2024 · GPA: 3.84/4.0 · Dean's List (All Semesters)

LEADERSHIP & HONORS

Guilford College Golf Team & Student-Athlete Advisory Committee · 2021–2025

3× NCAA DIII All-America Scholar · PING All-American Honorable Mention (2024–25) ·
ODAC / VA Farm Bureau Scholar Athlete of the Year (2024–25) · All-ODAC First Team (2024–25) · 4× All-Academic ODAC Team ·
All-ODAC Second Team (2022–23) · English Athletic Leadership Award, Guilford (2025) · ODAC Sportsmanship Team (2023–24)

EXPERIENCE

AI Domain Expert (Independent Contractor) · Mercor Intelligence

May 2026 – Present

- Providing specialized domain expertise to evaluate and improve the reasoning, accuracy, and output quality of foundation models for top-tier AI labs.
- Operating under strict non-disclosure agreements (NDA) while contributing to the training pipelines and advanced capabilities of next-generation LLMs.

Founder & AI Systems Developer · Via Vera (Independent)

Sept 2025 – Present

- Interacted directly with external customers to gather business requirements, translating complex needs into scalable technical solutions and API integrations (JSON, REST).
- Architected data integration pipelines using Python and PostgreSQL, mapping source-to-target data to ensure accurate extraction and reporting for multiple service verticals.
- Designed business intelligence dashboards and executed advanced SQL queries to monitor KPIs, testing data models to continuously refine business requirements.
- Demonstrated strong problem-solving and planning skills, delivering a multi-tenant SaaS platform that improved client revenue streams by automating booking and reporting.

Professional Tour Caddie · Independent

May 2025 – Present

- On-course strategic partner for a professional golfer, synthesizing real-time course conditions, historical scoring data, and situational variables to inform high-stakes decisions under pressure.
- Developed analytical frameworks for shot selection using shot dispersion data, wind modeling, and course mapping to support data-driven in-round strategy.

Data Analyst · IronPlate Solutions

May 2025 – Sept 2025

- Collaborated with internal stakeholders to gather, document, and structure business requirements, directly influencing strategic decisions and pricing benchmarks.
- Designed ETL data integration and Python automation pipelines, utilizing SQL to reduce manual processing time by ~70% and ensure data accuracy.
- Prototyped Tableau reports and built scalable Excel data models using relational principles, enabling seamless migration to a formal Data Warehouse.
- Communicated complex data findings clearly to both technical and non-technical stakeholders, exhibiting strong analytical skills and a highly proactive attitude.

Quality Control Analyst · DraftKings / Scouting Heroes

July 2024 – May 2025

- Operated in a fast-paced, agile environment, utilizing Excel to monitor and validate live data pipelines, ensuring accuracy and integrity of performance metrics.
- Executed quality assurance testing and SQL data extraction on large-scale datasets to influence pricing characteristics and reduce downstream error rates.
- Collaborated cross-functionally with wide varieties of colleagues, communicating complex data issues rapidly to ensure successful execution against set targets.

Data Analytics Process Improvement Intern · Guilford College

Aug 2023 – May 2024

- Extracted and analyzed multi-year enrollment data using advanced SQL queries, identifying inefficiencies in admissions outreach and applicant conversion.
- Designed and prototyped BI reports (Tableau, Power BI) to test data models, visualizing funnel trends that surfaced the stages responsible for 68% of drop-off.
- Presented findings with confidence to the Board of Trustees and senior leadership, successfully gathering requirements to co-create cross-departmental implementation plans.

- Interacted closely with internal customers across admissions and financial aid to validate data assumptions, demonstrating a strong customer focus and problem-solving mindset.
